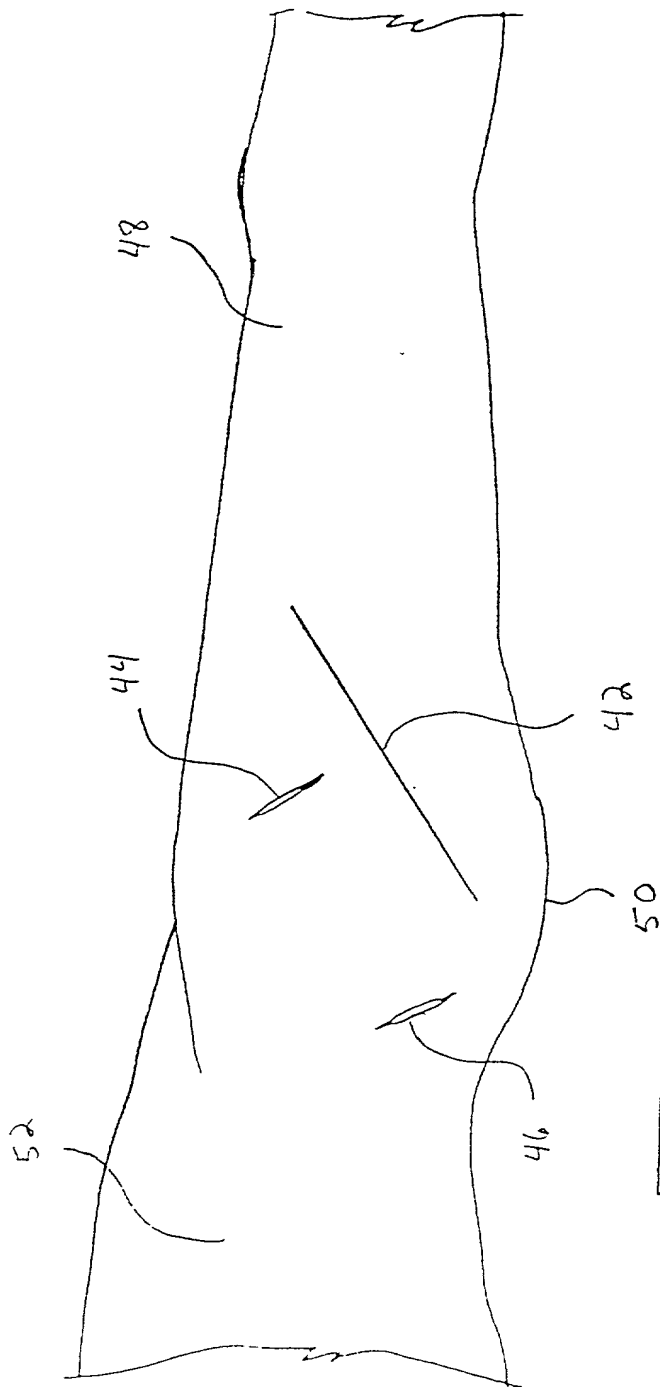

FIG. 1

A hand-drawn schematic diagram of a mechanical assembly, likely a pump or valve mechanism. The diagram includes several labeled components:

- 52**: A vertical dashed line on the left side, possibly representing a guide or support.
- 54**: A curved line segment in the upper right, possibly a cam or a guide surface.
- 56**: A curved line segment in the center, possibly a valve or a seal.
- 59**: A curved line segment on the right side, possibly a cam or a guide surface.
- 60**: A curved line segment in the center, possibly a valve or a seal.
- 62**: A vertical dashed line on the left side, possibly representing a guide or support.
- 64**: A curved line segment in the upper right, possibly a cam or a guide surface.
- 66**: A curved line segment on the right side, possibly a cam or a guide surface.
- 68**: A curved line segment on the right side, possibly a cam or a guide surface.
- 70**: A curved line segment in the center, possibly a valve or a seal.
- 71**: A curved line segment in the center, possibly a valve or a seal.

The diagram shows a complex arrangement of these components, with some parts overlapping or interacting. The lines are hand-drawn and somewhat irregular, suggesting a preliminary sketch or a conceptual drawing.
